1	Introduction	1
1.1	Contributions	3
1.2	Outline	3
2	Problem	5
2.1	Proposed Approach	6
3	Related Work	9
3.1	Shape Completion	9
3.1.1	Shape Priors	10
3.2	3D Deep Learning and Amortized Inference	10
3.2.1	3D Deep Learning	11
3.2.2	Amortized Inference	11
4	Deep Learning	13
4.1	Tensors	13
4.1.1	Basic Tensor Operations	14
4.2	Layered Neural Networks	15
4.3	Convolutional Neural Networks	16
4.3.1	Convolution	17
4.3.2	Convolutional Layer	17
4.3.3	Pooling and Upsampling	18
4.4	Auto-encoders	19
4.5	Training	21
4.5.1	Losses	21
4.5.2	Stochastic Gradient Descent	22
4.5.3	Weight Initialization	24
4.5.4	Error Backpropagation	24
4.5.5	Regularization	25
4.5.6	Data Augmentation	27
4.6	Discussion	27
5	Shape Representation	29
5.1	Point Clouds	29
5.2	Meshes	30

5.3	Occupancy Grids	31
5.4	Signed Distance Functions	31
6	Shape Prior	33
6.1	Variational Inference	34
6.2	Gaussian Variational Auto-Encoder	35
6.2.1	Practical Considerations	36
6.3	Bernoulli Variational Auto-Encoder	39
6.3.1	Practical Considerations	41
6.4	Discussion	42
7	Shape Inference	43
7.1	Maximum Likelihood	44
7.1.1	Bernoulli Maximum Likelihood	44
7.1.2	Practical Considerations	45
7.2	Amortized Maximum Likelihood	45
7.2.1	Bernoulli Amortized Maximum Likelihood	46
7.2.2	Gaussian Amortized Maximum Likelihood	46
7.2.3	Practical Considerations	48
7.3	Extended Variational Auto-Encoder	49
7.3.1	Practical Considerations	52
7.4	Discussion	53
8	Data	55
8.1	3D Example and ShapeNet	55
8.1.1	Mesh Pre-Processing and Voxelization	56
8.1.2	Mesh Filling	58
8.1.3	Mesh Rendering and Observation Voxelization	58
8.1.4	Noise	59
8.1.5	Discussion	60
8.2	KITTI	61
8.2.1	Point Cloud Voxelization	61
8.2.2	Free Space Voxelization	61
8.2.3	Filtering	62
8.2.4	Discussion	62
9	Experiments	63
9.1	Experimental Setup	63
9.1.1	Architecture and Training	64
9.1.2	Evaluation	64
9.2	3D Example	65
9.2.1	Shape Prior	66
9.2.2	Amortized Maximum Likelihood	68
9.2.3	Extended Variational Auto-Encoder	71

9.2.4	Discussion	71
9.3	ShapeNet	72
9.3.1	Shape Prior	72
9.3.2	Amortized Maximum Likelihood	74
9.3.3	Extended Variational Auto Encoder	76
9.3.4	Supervised Baseline	77
9.3.5	Discussion	78
9.4	KITTI	78
9.4.1	Amortized Maximum Likelihood	79
9.4.2	Supervised Baseline	81
9.4.3	Discussion	82
10	Conclusion	83
10.1	Future Work	84
	Bibliography	85
A	Shape Representation	99
A.1	Watertight Meshes	99
B	Shape Prior	101
B.1	Probabilistic Principal Component Analysis	101
B.1.1	Practical Considerations	105
C	Shape Inference	107
C.1	Non-Probabilistic Approach	107
C.1.1	Free Space Loss $\mathcal{L}_{DL,0}$	108
C.1.2	Point Loss $\mathcal{L}_{DL,1}$	108
C.1.3	Practical Considerations	109
D	Data	111
D.1	2D Example	111
D.1.1	Ray Tracing	111
D.1.2	Noise	113
D.1.3	Discussion	114
D.2	3D Example	115
D.3	ShapeNet	116
D.4	KITTI	117
E	Experiments	119
E.1	Training Details	119
E.2	Evaluation	120
E.3	2D Example	120
E.3.1	Shape Prior	121

E.3.2	Maximum Likelihood	124
E.3.3	Non-Probabilistic Approach	126
E.3.4	Amortized Maximum Likelihood	127
E.3.5	Extended Variational Auto-Encoder	129
E.3.6	Discussion	130
E.4	3D Example	131
E.5	ShapeNet	134
E.6	KITTI	137
